

# Car Transportation

Since Delivered on Time's inception, car transportation has been something we have invested a lot of time and effort into perfecting. For your time sensitive car movements whether it is a single seater race car; an outside broadcast vehicle; or your pride and joy as you're relocating, D.O.T offers a comprehensive service to suit your needs.

**D.O.T**

## By air

We take pride in handling your vehicle – from collection of your car prior to shipment with one of our dedicated car transporters; carrying out dangerous goods checks; customs clearances to overseeing the loading of the car with the airline to ensure no damage occurs.

When we collect your vehicle a full inspection will be carried out and inspection sheet completed; your vehicle will then be inspected at every stage of the movement to ensure everything is in order.

## By road

We have the capability to move vehicles by road around the UK, mainland Europe and beyond as necessary with our fleet of specialist car transporters. We can offer covered single car transportation through to a fully loaded high-end race transporter capable of carrying several cars and running equipment.

## By sea

Our dedicated seafreight division, Seacon UK, has many years experience of shipping cars and other vehicles by seafreight container and roll-on roll-off (RoRo) vessel as required. We can also provide racking solutions to maximise the number of cars per container and thus reduce your costs when sending more than one vehicle.

## Special projects

Our London office has experience in moving entire motorsport series around the world and has handled in excess of 30 cars in one shipment. We have our own bespoke airline racking systems designed for single seater race cars and 16ft and 20ft double car racking systems capable of taking a range of different size road cars and specialist vehicles.

For more information about our services please visit our website or contact a member of our team by phone or email to see how we may be able to help with your logistics needs.
