

# HYDRAFLOW

## next generation connector for Motorbase BTCC

As part of the technical preparations for this year's BTCC, Team Motorbase are using Hydraflow 14J21 connectors in critical underbonnet areas on the team's two cars.

**"We like the slick, secure way the 14J21 operates – essential for quick component changes. It's a great improvement on previous connectors"**

**Oliver Collins**

Motorbase Performance Team Manager

The Hydraflow 14J21 Clamshell is a threadless flexible coupling with a unique safety feature for fluid transfer in motorsport applications and used with industry standard flanges.

14J21 fluid control

Locks automatically

Gloved hand operation

Lightweight and flexible

Integral bonding wires

Aerospace standard spec

Safety strap
